PRESS RELEASE

Anglo European School Leads the Way as Essex's Only State School Offering the International Baccalaureate

Anglo European School is the only Essex state school which offers the International Baccalaureate Diploma and IB Career Programme.

Unlike most post -16 courses that focus on a few subjects, the IB requires students to study a range of subjects including languages, sciences, mathematics, humanities, and the arts. This brings breadth and depth to their studies and keeps future university and career options open.

The IB also notably encourages students to develop critical thinking skills; to develop an independent ability to analyse, evaluate, and question information critically. This helps students become independent learners and problem-solvers. It nurtures strong study skills, time management and global awareness through an interconnected coherent curriculum of six interdisciplinary subjects around a core offer including the Extended Essay research project, CAS (Creativity, Activity, Service) through which students are encouraged to take part in arts, sports, and community or charitable service, building leadership, resilience, teamwork, and confidence.

Furthermore, the IB engenders academic challenge, outstanding personal development and international awareness which prepares students for the challenges and opportunities of a global economy and society.

Many IB graduates report that the programme helped them manage workloads, conduct research, write essays, and study independently, making the transition to higher education smoother.

.../

“If you are a positive, passionate and prepared student willing to learn just as much about yourself as the subjects you study, then you are an IB student”. Anglo IBDP student.

“Students who are confident enough to choose the IB are confident enough to make change in the world”. Anglo IBDP student.

Mrs Gee, Headteacher added, "Our IB students become knowledgeable, open-minded, and independent learners, whilst gaining qualifications respected by universities and employers worldwide. It facilitates a post-16 study of breadth and depth which is unrivalled in terms of high quality, rigorous teaching and learning, interdisciplinary study and a global awareness."
